

Basic Detail Report

Title Stand

Date 1780-1800

Primary Maker Unknown

Medium Cherry and iron

Basic Detail Report

Description Cherry stand in the late Chippendale or early Federal style. The

stand has a scalloped top, over a slender baluster-shaped pedestal over a

cylindrical base, and three cabriole legs with pad feet. The baluster-shaped

pedestal consists of a cylindrical top over a baluster, over a recessed band, over

a compressed ball, over the cylindrical base. The surface has a cracked lacquer

finish. Condition: Five of the six screws on the cleat are missing, thus, the cleat

and top are not firmly joined. The stand has been refinished. Design and

Construction Details: The top is made from two boards that are butted together.

The top is screwed to a rectangular cleat from below. The pedestal is tenoned to

the cleat. Each leg is dovetailed to the base of the pedestal. An iron plate is

nailed to the underside of the pedestal where the legs join the base. The top of

each foot has a barely defined ridge; the underside of each foot has a small pad.

Dimensions Primary Dimensions (height x width x depth of top): 26 3/16 x 20 1/4

x 19 7/8in. (66.5 x 51.4 x 50.5cm) Component (maximum width between two

feet): 18 1/2in. (47cm)
