

# Basic Detail Report

## Title Stand

Date 1795-1815

Primary Maker Lot Norton Seymour

Medium Cherry, iron

# Basic Detail Report

Description Cherry stand in the late Chippendale or early Federal style. The

stand has a round top, over a slender baluster-shaped pedestal, over a

cylindrical base with three cabriole legs, each with a pad foot (each foot is

replaced). The baluster-shaped pedestal has a ring toward the top of the

baluster, and multiple reeding just above the cylindrical base. Condition: Each

foot has been reattached at the ankle. One leg was re-attached or repaired;

there are multiple small nails and splits to the wood where the leg joins the

pedestal base. The stand is refinished. Design and Construction Details: The top

is made from a single board and is screwed to a rectangular cleat from the

underside. The pedestal is tenoned into the cleat. Each leg is dovetailed to the

base of the pedestal. An iron plate with three small projecting strips is nailed

and screwed to the underside of the pedestal, where the legs join the base.

Dimensions Primary Dimensions (height x diameter of top): 27 3/8 x 16in. (69.5 x

40.6cm) Component (maximum width between two legs): 19 1/4in. (48.9cm)
