

Basic Detail Report

Title Pitcher

Date about 1845

Primary Maker William Davenport & Company

Medium Mold-formed buff-colored earthenware with a blue-tinted glaze, black underglaze decoration, and overglaze enamels in orange, yellow, pink, and green

Description Tall, round, buff-colored earthenware pitcher with a blue-tinted glaze, a type of ceramic known as pearlware. The pitcher is part of a larger

Basic Detail Report

partial toilet set, consisting of a washbowl (.1) and pitcher (.2), two matching pitchers (.3 and .4), a shaving mug (.5), a soap dish (.6a-c), a toothbrush holder or razor box (.7a,b), and a lid (.8). The entire set is decorated with a floral pattern and border. The naturalistic floral pattern consists of variously sized flowers transfer-printed in black beneath the glaze, with green, pink, and light orange enamel highlights hand-painted over the glaze. The remaining decoration consists of a scalloped border made up of a printed, underglaze, black, scalloped band, next to an overglaze, hand-painted, orange, scalloped band. This orange and black border is interrupted periodically by a group of elaborate scrolls of various sizes and widths and highlighted in green enamel. The scrolls surround a roughly diamond-shaped, scalloped-edge decorative element that is painted with light orange enamel. Finally, on all the objects in the set, the blue-tinted glaze has pooled around the printed decorative elements and raised or recessed portions of the ceramic's surface, giving the set a pearly blue and white appearance. The pitcher sits on a small, circular foot with the orange and black border around the edge. It then swells to its widest point, where large flowers are hand-painted with pink, yellow, green, and orange enamels. The pitcher narrows again to the neck, before flaring slightly for the scalloped rim and spout. The black and orange border decorates the rim, with groups of flowers printed and hand-painted between the scrolls and orange decorative elements on the border. There are two mold lines on the pitcher, one running down the side of the pitcher below the spout, and the second beneath the handle. The handle was probably formed in a mold and attached by hand. A variation on the

Basic Detail Report

orange and black border, surrounded by scrolls, decorates the length of the

handle. There is only the smallest amount of crazing on the surface of the

pitcher, located where the neck swells to the widest diameter to the right of the

handle.

Dimensions Primary Dimensions (height x width x depth): 14 1/2 x 8 1/8 x 5 3/8in.

(36.8 x 20.6 x 13.7cm)
