

Basic Detail Report

Title Electrical Insulator

Date 1986

Primary Maker The Hartford Faience Co.

Medium Mechanically-molded porcelain with a grey, black, and metallic glaze

Description Long, circular, porcelain insulator that is made of one solid piece of white porcelain. The insulator has a hollow, cylindrical core. The top portion of the insulator is shaped by six discs all connected by porcelain and covered with an opaque, glossy, grey glaze. Below this is a narrower porcelain component covered in matte, black glaze. The insulator narrows again to form a slightly tapered cylinder that is covered in a metallic glaze, possibly incorporating gold or gold oxide. Finally, the bottom portion of the insulator is covered with matte black, then glossy grey glaze.

Dimensions Primary Dimensions (length x diameter): 29 x 5in. (73.7 x 12.7cm)
