## Title Ashtray, Lighter and Pamphlet

Date about 1955

Primary Maker The Hartford Faience Co.

Medium Ashtray (.a) and Lighter (.b): Mold-formed porcelain with a brown glaze, leather, gilding, and cast brass. Pamphlet (.c): Wove paper.

Description Round ashtray (.a) made of porcelain with an opaque brown glaze, a lighter (.b) made of porcelain and brass, and a wove paper pamphlet (.c). The ashtray is shallow and round, with horizontal ribs on the sides. There is a second, circular rim inside, intended to hold the ashes, with six semi-circular indentations on the rim. The brass lighter consists of a short, round, hollow, porcelain column with horizontally ribbed sides. The lighter fits snugly inside the porcelain column. The lighter has a sleek, ribbed handle, which, when pressed down, caused the lighter mechanism to lift up and produce a flame. The

# Basic Detail Report

underside of the lighter has two screws, intended to enable the owner to refill the fluid. One of the screws is stamped "EVANS/ FUEL", referring to the manufacturer. The bottom of the porcelain lighter has a circular, leather piece attached. It is stamped and gilded with the words "THE HARTFORD FAIENCE CO. HARTFORD, CONN./ QUALITY ELECTRICAL PORCELAIN", an advertisement for the Hartford Faience Company. The pamphlet serves as advertising for the Evans Case Co. and gives instructions on how to use, maintain, and refill an Evans Case Co. lighter. It is printed in black and teal ink. The ashtray has many scratches along the top edge of the center rim and a few scratches on the inside bottom of the area meant to hold ashes. The lighter has some light tarnishing on the handle and dirt near the lighting mechanism. The pamphlet has deep fold creases and one area where heat from the lighter caused the paper to turn a light brown.

Dimensions Component (height x diameter of lighter): 3 1/2 x 2 1/2in. (8.9 x 6.4 cm) Component (diameter of ashtray): 6 7/8in. (17.5cm)
