

# Basic Detail Report

**Title Lidded Preserve Jar**

Date early 19th century

Primary Maker Unknown

Medium Wheel-thrown redware with a lead glaze and black decoration

# Basic Detail Report

Description Large, cylindrical, small-mouthed redware preserve jar (.a) with a

flat bottom, cylindrical body, and a narrow neck that flares to support a fitted lid

(.b). Two incised lines circle the shoulder of the jar. The interior of the jar is

coated with a clear lead glaze. Much of the exterior is coated as well, with the

exception of the bottom and the lower inch of the sides of the jar, which are

unglazed. Several irregular patches of manganese black have been applied to

the exterior of the jar. The same glaze and manganese black decoration have

been applied to the exterior of the lid as well. The domed lid has a circular disk-

shaped finial in the center, to act as a handle or a foot ring when inverted. The

underside of the lid is not glazed. There is crazing over all the glazed surfaces of

the lid and jar; some of the crazing on the exterior of the jar has resulted in

chipping. There are also light scratches on the exterior of the jar. Many small

chips in the glaze have rubbed or chipped off the top surface of the rim of the jar.

Dimensions Primary Dimensions (height including lid x diameter): 11 1/2 x 6in.

(29.2 x 15.2cm)
