**Title** Watering Can or Jar

Date 1850-1900

Primary Maker Unknown

Medium Wheel-thrown redware with a brown lead glaze

# Basic Detail Report

Description Short, redware watering can or jar with a brown lead glaze; the glaze covers the exterior of the watering can/jar, with the exception of a small portion of the foot, which is left unglazed. The watering can/jar has a flat foot and swelled sides with a domed top, shaped somewhat like a beehive. An oval loop handle, formed with an applied strap of redware, is located at the top center of the watering can/jar. To one side, a flared cylindrical spigot emerges from the side. On the opposite side, a round knob is attached to the watering can/jar. The knob has a hole in it that pierces the side of the watering can/jar. There is light crazing over all the exterior glazed surfaces of the watering can/jar, and several light scratches around many parts of the watering can/jar. There are two chips in the handle and several chips in the rim of the spigot, revealing the redware below.

Dimensions Primary Dimensions (height including handle x width including spouts x depth): 6 3/4 x 4 1/4 x 3 3/4 in. (17.1 x 10.8 x 9.5cm)
