## Title Jar

Date about 1800-1830

Primary Maker Day Pottery

Medium Wheel-thrown redware with a lead glaze and manganese black decoration

# Basic Detail Report

Description Round, redware jar with a clear lead glaze on the interior and

exterior, with the exception of the foot, which is unglazed. The jar is decorated

on the exterior with randomly-applied spots of manganese black decoration.

The jar has a round foot and slightly swelled sides that narrow at the neck before

widening to form a plain rim. A raised band circles the neck of the jar. The jar has

two applied, cupped lug handles applied on opposite sides of the jar just below

this raised band. Three separate groups of incised lines circle the jar just below

this raised band (underneath the handles), below the handles, and at the widest

point of the jar. There are several minor chips and one larger chip on the outer

edge of the rim, and light scratches over the body of the jar. All the glazed

surfaces of the jar have light crazing.

Dimensions Primary Dimensions (height x diameter): 9 1/2 x 6 1/2in. (24.1 x 16.5

cm)
