

Basic Detail Report

Title State of Connecticut Armory, New Britain

Date 1915

Primary Maker John J. McMahon

Medium Drawings; black and red ink on linen

Description Drawings include plans for basement, first floor, second floor, and third floor, and elevations for Grand Street, rear, front, and south side. Plans include rifle range, bowling alley, coal room, boiler room, drill shed, Company E locker room, Company E parlor, Company E officer's room, captain's office, drains and ramps, sergeant's store room, as well as notes on heating and electrical systems. Elevations include basement level, main floor, second and third floors. Basement level features concrete walls with steel lintel windows. Main level features ten bays and a two-bayed semicircular arched entrance with glazed doors under an intersecting gable with roundel. Each bay includes square panes with segmented arches except the left bays, which have double hung windows with splayed lintels. Both the conical tower and Mansard tower are shown. Scale for drawings is $1/8" = 1' 0"$.

Dimensions Sheet (height x width): 22 1/4 x 25 1/8in. (56.5 x 63.8cm)
