

Basic Detail Report

Title Nipple Shell

Date 1825-1860

Primary Maker Unknown

Medium Free-blown colorless lead glass

Description Free-blown colorless lead glass nipple shell in the shape of a dome, with bottom edges that curve up and inside to form a round opening. The top of the nipple shell is ground and has the remains of a pontil mark. The bottom edge has a small round opening. The glass contains a few air bubbles and seeds, or spots of unvitified matter.

Dimensions Primary Dimensions (height x diameter): 1 1/8 x 3in. (2.9 x 7.6cm)
