

# Basic Detail Report

## Title Bank

Date patented 3 July 1923

Primary Maker Mechanics Savings Bank

Medium Leather and gold-painted metal

# Basic Detail Report

Description Coin bank in the shape of a book. The bank / book has a black

leather cover, and gold-painted metal forms the pages. A slot cut in the of the

pages allows coins to be deposited; a keyhole on the side of the pages enables

the bank to be unlocked (there is no key). The black leather cover is decorated

with gold, green, and blue highlights. A geometric pattern is formed of different

colored subsections. Both the front and back cover have a central black panel

outlined in gold. The panel on the front shows the main facade of a bank, with

an American flag flying atop the building. The pediment on the building has the

words, "MECHANICS SAVING BANK". Below the bank's facade, printed in raised

black letters, is "INCORPORATED 1861". Gold lettering below that reads,

"MECHANICS/ SAVINGS/ BANK/ 80 PEARL STREET/ HARTFORD, CONNECTICUT".

The back cover also has a black panel outlined in gold. In side the panel is an

oval within an oval. The interior oval reads "STABILITY" over the image of a

pyramid. The outer oval reads, "MUTUAL SAVINGS BANKS/ OF CONNECTICUT". A

gold rectagle outlined in blue fills the top half of the spine of the bank / book.

Raised letters inside the rectangle read, "BOOK/ OF/ THRIFT". At the bottom of

the spine is the Roman numeral "VIII" in raised letters. The metal on the bottom

of the bank is stamped, "BANKERS/ UTILITIES CO./ SAN FRANCISCO/ PATENTED/

JULY 3 1923/ MADE IN U.S.A." Across from that stamp, the bottom edge is also

stamped, "1941".

Dimensions Primary Dimensions (height x width x depth): 4 5/8 x 4 3/16 x 1 1/8in.

(11.7 x 10.6 x 2.9cm)
