

Basic Detail Report

Title Coffee Mill

Date after 1905

Primary Maker Landers, Frary, and Clark

Medium Sheet iron, paint

Description Coffee mill of sheet iron painted black. There is a relatively square base, raised in a slightly curved way, to meet the body of the mill which is rectangular in shape. There is a handle attached to the left rear corner of the mill, which is for holding the mill steady with one hand while turning the handle

Basic Detail Report

to grind the beans with the other. There is a small metal drawer with metal pull

loop in the bottom front of the base, which holds the grounds. The top of the

mill is slightly curved, and fits over the rectangular body with a light overhang.

There is a lid which lifts up, in the front top, which is where the coffee beans are

poured in for grinding. The handle is attached to the top through the top and

down into the grinding mechanism. The handle is wooden, bolted to the metal

arm. A round label is affixed to the front of the body. It is red and gold with

mostly black lettering: "UNIVERSAL COFFEE MILL/ NO 110/ ONE POUND/ PAT.

FEB 14, 1905. / MADE BY/ LANDERS FRARY & CLARK. NEW BRITAIN, CONN., U.S.A."
