

Basic Detail Report

Title Telephone Pay Station Model

Date 1907-1920

Primary Maker Gray Telephone Pay Station Company

Basic Detail Report

Medium steel, wood

Description Model of a pay telephone machine with a coin slot at the top with slots for 25¢, 10¢, and 5¢ mounted on top of a silver piece of steel, which would normally have the speaking part, but since it is missing, there is an empty, round portion at the top where it would go and four round holes of different sizes below. On the left side is a slot for a receiver. The bottom section is a hollow black box with the “Coin Return” on the left side. The back section is the plate which fits over the entire component. On the left side is a receiver arm.
