

Basic Detail Report

GUIDELINES FOR RE-OPENING STATE FACILITIES

(July 7, 2020, Version #2)

This is a living document, developed in conjunction with Department of Public Health and subject to modifications when new information becomes available

SOCIAL DISTANCING/INFECTION CONTROL – Behavioral Requirements

In accordance with DECD Rules for Reopening and continuing operations for Essential Employers:

- In workplace settings where employees are working alone in segregated spaces (i.e. cubicles with walls that extend at least 30 inches above the desk top, private offices, etc.), employees may remove their masks. However, workers shall wear a mask or face covering from the time they enter the building until the time they arrive at their cubicle/work station and at any time they are leaving their work station and moving around common areas (i.e. in hallways and stairwells, going to the restroom or break room, etc.). For employees working in congregate settings (i.e. open office or manufacturing floors without appropriately sized cubicle walls, areas open to the public, shared offices, or similar settings), those workers shall wear a face covering as above, as well as when they are at their work station. Notwithstanding the foregoing, in sparsely populated congregate settings (certain warehouses, large office floors with few workers, etc.) in areas where workstations are 15 feet apart or greater, employees may remove their masks. **Regardless of the number of other individuals in the vicinity, all persons shall wear a mask or face covering from the time they enter the building until the time they arrive at their work station, and at any time they leave their work station and move around common areas (e.g., in hallways and stairwells, going to the restroom or break room, etc.).**
