## Title Food Processor and Attachments

Date 1900-1964

Primary Maker Landers, Frary, and Clark

Medium Plated cast metal and wood

Description Plated metal meat grinder with crank handle with wooden knob and screw plate to allow grinder to be attached to a table or a counter. Plated metal food processor with three separate blades that may be interchanged. A wooden handle attaches to the crank, and the unit is designed to be bolted to the edge of a countertop or work table prior to use. Food would be inserted at the top of the appliance and then appear at the side by the blade once processing had been completed by turning the crank.
