

# Basic Detail Report

## Title Coffee Cup and Saucer

Date about 1805-1810

Medium Wheel-thrown Chinese export porcelain with overglaze gilding and enamels in brown and peach

Description Round, Chinese export porcelain coffee cup and saucer with gilding and hand-painted overglaze enamels in brown and peach. Both the coffee cup and saucer are decorated with a single hand-painted eagle. The eagle has a shield body and clutches a branch in one claw and arrows in the other. The eagle's wings are outstretched, and the head faces left. Above the eagle's head, in a semi-circular area, is a field of peach enamel with small gilded stars. This area is outlined by a semi-circular line of brown enamel above, and a gilded sunburst pattern above that. The eagle is painted with brown enamel highlighted in gilding. A script, gilded letter "F" is hand-painted in the center of the shield. Coffee cup (.a): The coffee cup sits on a flat foot and has vertical sides. A handle is applied to one side of the coffee cup, consisting of two strands of molded porcelain that have been twisted together. Small dots of red enamel have been applied to the raised leaf decoration where the handle meets the body of the coffee cup. The eagle described above is hand-painted opposite the handle, and there is a line of gilding at the rim. The gilding at the rim is mostly worn off, and the gilding on the eagle has a few areas of loss. Saucer (.b): The saucer sits on a flat foot and has straight sides that extend out at a forty-five degree angle from the foot. The eagle described above is hand-painted in the
