## Title Houses

Date after 1972

Medium Photography; color Polaroid instant print on paper

Description Six Polaroid photographs of three buildings: one of a Queen Anne-style brick house, one of a brownstone building, and four of a "perfect six" style apartment building. The Queen Anne house and brownstone building are shown in their entirety. The four photographs of the apartment building were all taken from the same vantage point. There is a tree in front of the apartment building that in one photograph is leafy and almost entirely obscures the building behind it. In the other three, it is leafless and bare.
