Visit a Sweet Destination

A most pleasurable experience is visiting a Connecticut sugarhouse and tasting the sweet nectar sap collected to us creates the finest maple. The maple syrup industry has been around since the beginning of time and the process of making maple syrup is a most pleasurable experience. Maple syrup is collected in the spring and the sap is boiled down to the desired level and becomes maple syrup.

The maple season can begin in January and run through March. During these months, many days are necessary to produce a good crop of maple. The time spent along our scenic country roads, you may see places of scenic things from sugarhouses. This is a great time to see the sugarhouses and to see the maple syrup industry in action. To enjoy the season with you and to watch the process.

A 2005 Guide to Connecticut Sugarhouses

We invite you to visit a CT Connect sugarhouse. The past maple syrup industry is a most pleasurable experience. Maple syrup is collected in the spring and the sap is boiled down to the desired level and becomes maple syrup.
