Title Tea Table

Date 1760-1790

Primary Maker Unknown

Medium Cherry, brass and iron hardware

Description Cherry tea table in the Chippendale, or rococo, style. The tea table has a round top that is not stationary, but tilts up into a vertical position. The

Basic Detail Report

pedestal has two square blocks at the top, separated by four turned posts, one

at each corner. The pedestal consists of a cylinder over a fluted cone, a

compressed ball carved with incised lines that curve up and to the right, and a

cylindrical base with three cabriole legs and claw-and-ball feet. The top of each

leg has a straight, incised line down the center that separates two rows of

incised leaves and branches. The lower edges of the pedestal base and the

underside of the legs near the base are carved with cyma curves, or S-curves,

and C-curves. Condition: There is a nine inch split in the top, beginning at the

edge. There is some light staining and discoloration on the top. The finish is

worn on each foot, and on one leg all the way up to the knee. One foot has an

unknown white substance adhered to the side. The finish may be old or original.

Design and Construction Details: The top is constructed of three boards that are

butted together. A pair of slender cleats are screwed to the underside of the top.

Between each cleat is a block which is attached to the cleats with round hinge

pins; the top pivots on these pins. A round brass catch holds the top in the

horizontal position. The block is the top of a box, formed of two square boards

that are separated by an upright, turned post at each corner. The lower block

has a round opening in the center, which fits over a tenon, or pillar, at the top of

the pedestal. The tenon has a small hole through which a key, or slender

rectangular block, is inserted to join the box with the pedestal. This construction

allows the top to rotate at the top of the pedestal. Each leg is dovetailed into the

base of the pedestal. A flat iron plate with three spokes is nailed to the underside

of the pedestal base and legs.
