

Basic Detail Report

THE NEW VELOCIFINE

This ancient city style of locomotion creates general excitement; those reports it is a necessity to put the thing on ice. At least this appears to be the case along the Hudson River. When the yacht-club races come on the water, such enterprises must followed at Poughkeepsie. A few days since, a rickshaws of the style represented in our sketch on this page was observed on the New York Harbor. The cause of the rickshaws is such like those which are commonly in use in this city. It has but one wheel, steered with a bar as in the last section, but armed with elastic bands to prevent its slipping forward or backward. It is also provided with many small wheels, so that it can move up and down stairs. This rickshaw is propelled with astonishing swiftness.

THE DONMUY DISASTER.

QUEEN DIABELLA
IN PARIS.

After all, the "affinity of blood" has no allegorical force, not either the hopes or the fears of those who proclaimed it the basis of the revolution. Few great events do exactly answer people's expectations either way, and it is well very accurate to say

Medium Wood engraving; printer's ink on wove paper

Basic Detail Report

Description Two views of the aftermath of a flood in Danbury, Connecticut,

resulting from a breach in a dam. The upper image shows two men looking at

the remains of the dam. There is a deep wide gap in the center of the dam,

surrounded by blocks of ice. Leafless trees and snow-covered hills are in the

background. In the lower image, ice is piled around a two-story house.

Additional houses are at left and right. At the left, a river flows beneath an

arched bridge. Leafless trees, apparently elms, dot the landscape. Hills are in the

background.

Dimensions Primary Dimensions (image height x width): $4 \frac{5}{8} \times 9 \frac{1}{16}$ in. (11.7 x

23cm) or smaller Sheet (height x width): $15 \frac{7}{8} \times 11$ in. (40.3 x 27.9cm)
