

# Basic Detail Report

**POISE:**  
 How successful you make one self to you, beauty. Hanover School training teaches one perfect poise and grace in every situation. You will learn to put on your dress and use it off gracefully... carry your head and gait properly... smiling yourself... walking so gracefully... carry air and drive them bravely. Confidence will be yours that you have learned that you are perfectly groomed and completely poised. Personality and executive improvement are an added bonus to this class.

**FOOD, GROOMING:**  
 This is a particularly important class for the white-collar housewife and her age. Care of the figure, skin and professional make-up are taught. Care of the hair, size and body figure are stressed. We stress good quality to have a work-up: so you experience hair-styling techniques and to discuss to prepare the graduate for job interviews.

**ETIQUETTE:**  
 Special emphasis is put on the training for the average student. They will have to sit in table party manners, table manners, introductions, and social graces. This builds behavior and confidence for all ages. Correct offer and business etiquette is taught also in the other classes.

**VOICE AND DICTION:**  
 Poise and poise for public speaking as well as pronunciation and voice projection are covered in this class. Correction of diction defects, proper breathing and pronunciation is emphasized. Emphasis on fluency and flexibility of the tongue are given. This class is conducted in small conference for public appearances and addresses as well as for company use.

Advanced students will be taught the proper use of the microphone for communicating, and all radio and television commercials.  
 We also build character and confidence for all ages.

**INSTRUCTION:**  
 Because we believe that the only way to build confidence and create poise is to sit with other people as much as possible, all of our instruction is given in class form. We try to limit the classes to eight students or less of approximately the same age. This method of teaching is particularly helpful to the self-improvement student and superior to the one made because she will have to work with others. EACH STUDENT IS INSTRUCTED INDIVIDUALLY by a skilled and experienced teacher especially trained for this purpose. The course runs for a period of eight weeks for one hour a day or evening, once a week. Classes often take longer than eight weeks to complete depending on the advancement of the individual, but no additional fee is charged for an extension of the course. Every graduate receives a diploma upon completion.
