

# Basic Detail Report

## Title Armchair

Date 1796-1800

Primary Maker John Wadsworth

Medium Basswood, maple, ash, oak

Description Dark green, painted armchair in the Windsor style, with a high back, a plank seat, and turned posts and legs. The back of the chair includes of a bowed crest rail atop seven tall spindles; the crest rail is serpentine, a shaped upper edge with an arch in the center flanked by flat scrolls. Below the crest rail is a rail that curves forward to form the flat, scrolled handholds. The rail contains the seven tall spindles and is supported at each arm by an additional short spindle and a post turned with a baluster form. The back of the armchair is slanted back; the spindles and posts are joined to the seat in a semi-circular arrangement. The basswood plank seat is shield-shaped and has a saucered, or recessed, surface with a flat area at the back where the spindles and posts join the seat. The sides and back of the plank are curved and chamfered, or cut at an angle. Below the seat are four turned legs that are raked, or slanted out from top to bottom; each is turned with a baluster form over a tapered ankle and foot. Each side of the chair has a single stretcher with an ovoid form in the center. Between the stretcher is a single medial stretcher, also with an ovoid form in the center. Condition: The rail has completely broken through where it joins the rightmost tall spindle; this joint has been repaired with nails. The right rear side of the plank seat has either partially or completely detached from the seat and

# Basic Detail Report

been reattached with nails or screws. The dark green paint is not original; the

later paint is applied over at least one layer of lighter green paint. Design and

Construction Details: The crest rail is supported on a tenon at the top of each of

the tall spindles; the center and each side spindle is also pinned to the crest rail.

These spindles extend through the rail. The rail is supported on a tenon at the

top of each short spindle and post; the tenon at the top of each post has a small

wooden wedge through the end. The spindles are tenoned down into the

spindle platform. The posts are tenoned through the spindle platform; the tenon

at the bottom of each post has a small wooden wedge through the end. The

plank seat is supported by a through tenon at the top of each leg; a wedge is

probably inserted through the end of each tenon. The side stretchers are

tenoned into the lower legs. The medial stretcher is tenoned into each of the

side stretchers.

Dimensions Primary Dimensions (overall height x width x depth):  $38 \frac{3}{4} \times 24 \frac{1}{8}$

$\times 22 \frac{3}{16}$ in. (98.4 x 61.3 x 56.4cm)
