

# Basic Detail Report

## Title Vial

Date 1830-1860

Primary Maker Unknown

Medium Mold-blown aquamarine glass

Description Mold-blown aquamarine glass vial with a flared, flat rim, a slight swell in the glass below the rim, then a narrower neck, a round body that widens from neck to base, and a pontil mark and a shallow kick on the bottom. The vial has two vertical mold lines on opposite sides. In the middle of one side, between the mold lines, is an impressed circle. Opposite the impressed circle is a rough area in the glass of approximately the same diameter as the circle.

Dimensions Primary Dimensions (height x diameter): 5 1/8 x 1 5/8in. (13 x 4.1cm)
