

# Basic Detail Report

## Title Santiago de Cube

Date 1898

Primary Maker Brigadier General George Malpas Cole

Medium Lithography; black and red printer's ink on cotton

Description Map of part of the province of Santiago de Cuba. Places are marked with their name and a circular symbol. Roads and what appear to be railroads are shown. Physical features include islands and rivers. Water depth is measured in fathoms; height is measured in feet. Other numbers are shown around on the map, in the areas representing water. Some of the numbers have letters representing some kind of units of measurement, although what they are is unclear. Below the title is list of the symbols denoting capitals, district seats, boundary lines, railroads, and roads. The abbreviations listed below signify physical features such as rivers, swamps, and hills; farms; sugarmills; harbors; shops and more. In the bottom is an inset index map showing all of the maps in the series.

Dimensions Primary Dimensions (image height x width): 38 5/8 x 23 3/4in. (98.1 x 60.3cm) Sheet (height x width): 41 5/8 x 26 7/8in. (105.7 x 68.3cm)
