

# Basic Detail Report

## Title Side Chair

Date c. 1780-1790

Medium Cherry and white pine Seat Frame: white pine

Description Chippendale side chair attributed to Eliphalet or Aaron Chapin

shops, East Windsor or Hartford, c. 1780-1790. Chair has straight legs, a back

splat with four vertical elements joined by two "V" shaped chevrons, and one

inverted forming a diamond. The slip seat has its original linen, three-piece

webbing, original sackcloth, marsh grass stuffing, and original linen undercover

held in place by many rose head nails. This upholstery technique is an indicator

of the Chapin shops. Glue blocks are all original, undisturbed, vertical grain pine,

nailed with rose head nails. The crest rail is loose at the proper left stile and can

be lifted to expose part of the round tenon joining the crest rail to the stile,

another strong indicator of Chapin shops origin.
