

Basic Detail Report

THE NEW VELOCIFINE

This somewhat dry style of innovation creates general excitement these reports to be a necessity to put this thing on ice. At least this appears to be the case along the Minkato River, where the young of the fish come on the ice in the spring and are followed by Pokagishkash, the male salmon which followed at Unalakleet. A few days since a videopole of the style represented in our sketch on this page was observed on the ice near Yarrowbush. The frame of the videopole is such that those which are commonly in use in this city. It has but one wheel, steered with a bar at its head section, the bar armed with sharp points to prevent its slipping from the ice. The wheels are of the heavy duty type and run on the ice. The fish are hooked and reeled. We from returning to the ice for this videopole is filled with something more modern.

THE DANDY DISASTER.

[illegible]

QUEEN MADONNA
IN PARIS.

After all, the "affinity of blood" issue is altogether beside the point: the hope or the fear of those who proclaimed the results of the revolution. Few great events do exactly answer people's expectations either way, and it is still very uncertain what will

Basic Detail Report

Description Two views of the aftermath of a flood in Danbury, Connecticut,

resulting from a breach in a dam. The upper image shows two men looking at

the remains of the dam. There is a deep wide gap in the center of the dam,

surrounded by blocks of ice. Leafless trees and snow-covered hills are in the

background. In the lower image, ice is piled around a two-story house.

Additional houses are at left and right. At the left, a river flows beneath an

arched bridge. Leafless trees, apparently elms, dot the landscape. Hills are in the

background.

Dimensions Primary Dimensions (image height x width): $4 \frac{5}{8} \times 9 \frac{1}{16}$ in. (11.7 x

23cm) or smaller Sheet (height x width): $15 \frac{7}{8} \times 11$ in. (40.3 x 27.9cm)
