

A detailed line drawing of a city skyline, featuring a prominent skyscraper with a crane on top, surrounded by other buildings and a street with cars. The drawing is a black and white line sketch, showing a dense urban environment. The central focus is a tall, rectangular skyscraper with a grid-like facade of windows. Atop this building, a construction crane is visible, with its boom extending upwards. To the left of the central tower, there is another tall building with a more complex, stepped profile. In the foreground, several smaller, multi-story buildings are depicted, some with flat roofs and others with more varied architectural details. A street runs through the lower portion of the drawing, with several small cars and what appears to be a bus or tram. The overall style is that of a conceptual architectural rendering, using clean lines and cross-hatching for shading. The drawing is signed 'WELAND 1990' in the bottom left corner.

Title Third Avenue, New York

Date 1970

Primary Maker Richard Welling

Medium Drawing; black marker on paper

Description Drawing of the construction of a building on Third Avenue in New York City, with much smaller buildings around it in the foreground.
