## Title Teacups

Date 1962

Primary Maker Josiah Wedgwood & Sons, Ltd.

Medium Mechanically-molded cream-colored earthenware with underglaze red decoration

Description Group of four cream-color earthenware teacups, a type of ceramic known as creamware. These teacups are part of a larger group of tea and dinner wares consisting of one creamer (.1), a lidded sugar bowl (.2a-b), four teacups (.3-.6), six saucers (.7-.12), six bread-and-butter plates (.13-.18), seven dinner plates (.19-.25) and six smaller plates (.26-.31). The group of tea and dinner wares is decorated with the same red, underglaze, transfer-printed elements, generally a pattern and border. The pattern consists of a branch containing several of the same kind of flower, the mountain laurel. The border consists of a

# Basic Detail Report

trailing vine with leaves, interrupted periodically by a cluster of five of these

same flowers. Various ceramics in the set are decorated with a shield containing

three vines on three trellises. The teacups each sit on a circular foot and have

gently ribbed sides and a small applied handle. The teacups are decorated with

the border of trailing vines, leaves, and flowers, printed on the outside of each

teacup below the rim. On one side, to the left of the handle, the border is

interrupted by a wide shield-shaped area with a small landscape inside. The

landscape shows a steamboat on a river, with a town on the far shore. Domed

towers, steeples, and some small buildings are visible in the town. There is a

small chip in the foot of teacup (.5).

Dimensions Primary Dimensions (height x width including handle x depth): 2 3/8

x 4 1/2 x 3 3/4in. (6 x 11.4 x 9.5cm)
