Basic Detail Report

Title Dish

Date 1835-1855

Primary Maker Unknown

Medium Pressed lacy-pattern colorless lead glass

Description Round, pressed lacy-pattern colorless lead glass dish with a flared, scalloped rim, S-curved sides, and a circular foot. The top of the dish has no raised pattern; the undeside is pressed with a pattern in the rococo revival style. The pattern consists of symmetrical sprays of leaves around a central star. The side of the dish has four evenly spaced scrolled cartouches. Each cartouche has a small star in the center, surrounded by diamond hatching. Between each

cartouche, there are sprays of leaves and stars, all on a stippled, or lacy-pattern, background. There are many small chips in the scalloped edge of the dish, and a single medium-sized chip. Additional chips are located on the circular foot.

Dimensions Primary Dimensions (diameter): 5 1/2in. (14cm)
