

Basic Detail Report

Title Porringer

Date 1815-1825

Primary Maker Thomas Danforth Boardman and Sherman Boardman

Medium Cast pewter

Description Cast pewter porringer with a basin-shaped body with straight, slightly flared sides. The porringer has a bead at the rim. The bottom of the porringer consists of a raised circular boss in the center, surrounded by a flat gutter. At the rim on one side, there is a handle that is burned on, or cast on directly, to the porringer. The handle is pierced and shaped like a crown. The top surface of the handle has a rectangular mark with the raised letters "TD&SB".

There is a linen mark on the interior of the porringer, corresponding to the location of the handle. Skimming marks are visible on the interior of the porringer and on the underside of the boss. Skimming Marks: Skimming marks

Basic Detail Report

are concentric rings left on cast pewter objects by skimming tools. Skimming is

the process of removing metal and smoothing rough surfaces by scraping the

pewter object as it rotates on a lathe. Linen Marks: Linen marks are the

impressions left behind by the piece of linen used in the process of burning a

pewter handle directly onto the body of a pewter object.

Dimensions Primary Dimensions (height x width with handle x depth at rim): 1 5

/8 x 5 1/2 x 3 15/16in. (4.1 x 14 x 10cm)
