

Basic Detail Renort

Title Map of the Farmington Canal

Date 2000

Primary Maker Carl E. Walter

Basic Detail Report

Medium Offset lithography; black and colored inks on paper

Description Map of the Farmington Canal, split into two sections and overlaid onto later relief maps of the area. On the left is the canal as it flowed through Connecticut from the Hampshire and Hampden Canal at the state line of Massachusetts to just south of Plainville, Connecticut. On the right is the canal as it flowed from south of Plainville to New Haven, Connecticut. The canal is color-coded for which parts remained as of 2000, when the map was published, and which are gone. Locks, culverts, drains and other structures along the canal are labeled, with a brief description of the object. These, too, are color-coded for which structures remain and which do not. On the right side of each map is a profile of the canal. Various facts about the canal are scattered across the map. The verso contains "historical vignettes" describing the canal as it ran through towns in Connecticut. The text is accompanied by images depicting some aspect of the canal in each town.

Dimensions Primary Dimensions (left side, image height x width): 36 x 12in. (91.4 x 30.5cm) Primary Dimensions (right side, image height x width): 36 x 12in. (91.4 x 30.5cm) Sheet (image height x width): 36 x 24in. (91.4 x 61cm)
