# Basic Detail Report

**Title Bulkeley Bridge Construction: Work on Foundation of Western Abutment, March 2, 1904**

Date 1904

Primary Maker Unknown

Medium Photography; gelatin silver print on paper

Description Construction equipment on the west bank of the Connecticut River includes a cement mixer, and buckets for pouring concrete, supported by chains and pulleys on a large crane. Ladders and other machinery, possibly including pile drivers, are on the wooden caisson at the left. Piles of dirt, crushed stone and rocks are on the back. Workmen, some wearing overalls, stand on wooden walkways. Some men have wheelbarrows. Steam rises from a pipe. A trolley car is on the temporary iron bridge in the background. Wires run overhead. Men

stand by the bridge railing. The bridge is supported by wooden abutments. Ice in

on the river in the background.

Dimensions Primary Dimensions (overall height x width): 6 5/16 x 8 1/4in. (16 x

21cm)
